CAP Goal Fund Projects

In FY 2016, Congress included a provision that enacted the Administration's request to collect funds from agencies to support efforts to achieve the Cross-Agency Priority Goals. This provision funds initiatives directly related to the outcomes and strategies of selected CAP Goals to drive improvements in best practices, collaboration, and innovation in government.

The Job-Creating Investment CAP Goal was awarded funding for three projects:

International Engagement Ready Communities Initiative.

This initiative will assist communities in attracting more foreign direct investment to strengthen their local economies by helping communities identify and adopt economic development and workforce best practices related to attracting FDI, and fostering a supportive environment for local exporting companies.

Enhancing Interagency Collaborative Framework Initiative.

This initiative will strengthen the established Interagency Investment Working Group by creating dedicated work streams to examine federal policies and practices that impact business investment in the United States.

Leapfrog Investment Promotion Agency (IPA) Applied Best Practices Learning Initiative.

This initiative will dedicate resources to research and operationalize best practices in investment promotion from other leading national-level IPAs to increase the effectiveness of federal investment promotion activities and programs in the United States.
